THE MINIPOOL ICON

An aerial photograph of a wetland landscape, likely a rice paddy field. The terrain is a complex network of narrow, winding water channels (ditches) that divide the land into irregular, roughly rectangular plots. The water in the channels is a deep, dark teal color, while the surrounding land is a lighter, mottled green, suggesting a mix of water and vegetation. The overall texture is highly detailed and organic. The text 'ICONIA, THE MINIPOOLICON' is overlaid in the upper left quadrant in a white, sans-serif font.

ICONIA,
THE MINIPOOLICON

THE SOUND
OF RELAXATION

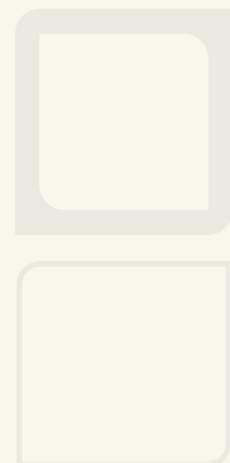

ICONIA IS LIVING

LIFE'S ENJOYMENT

The concept of the above-ground pool is redefined, overturned, layer by layer, grain by grain, shaping a unique object. With ICONIA, every moment becomes special.

From an aperitif by the pool to daily relaxation, ICONIA is the perfect place to celebrate life's little pleasures; an idea of luxury that resides in simplicity.

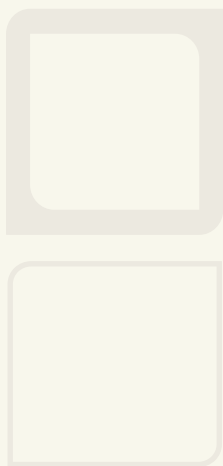

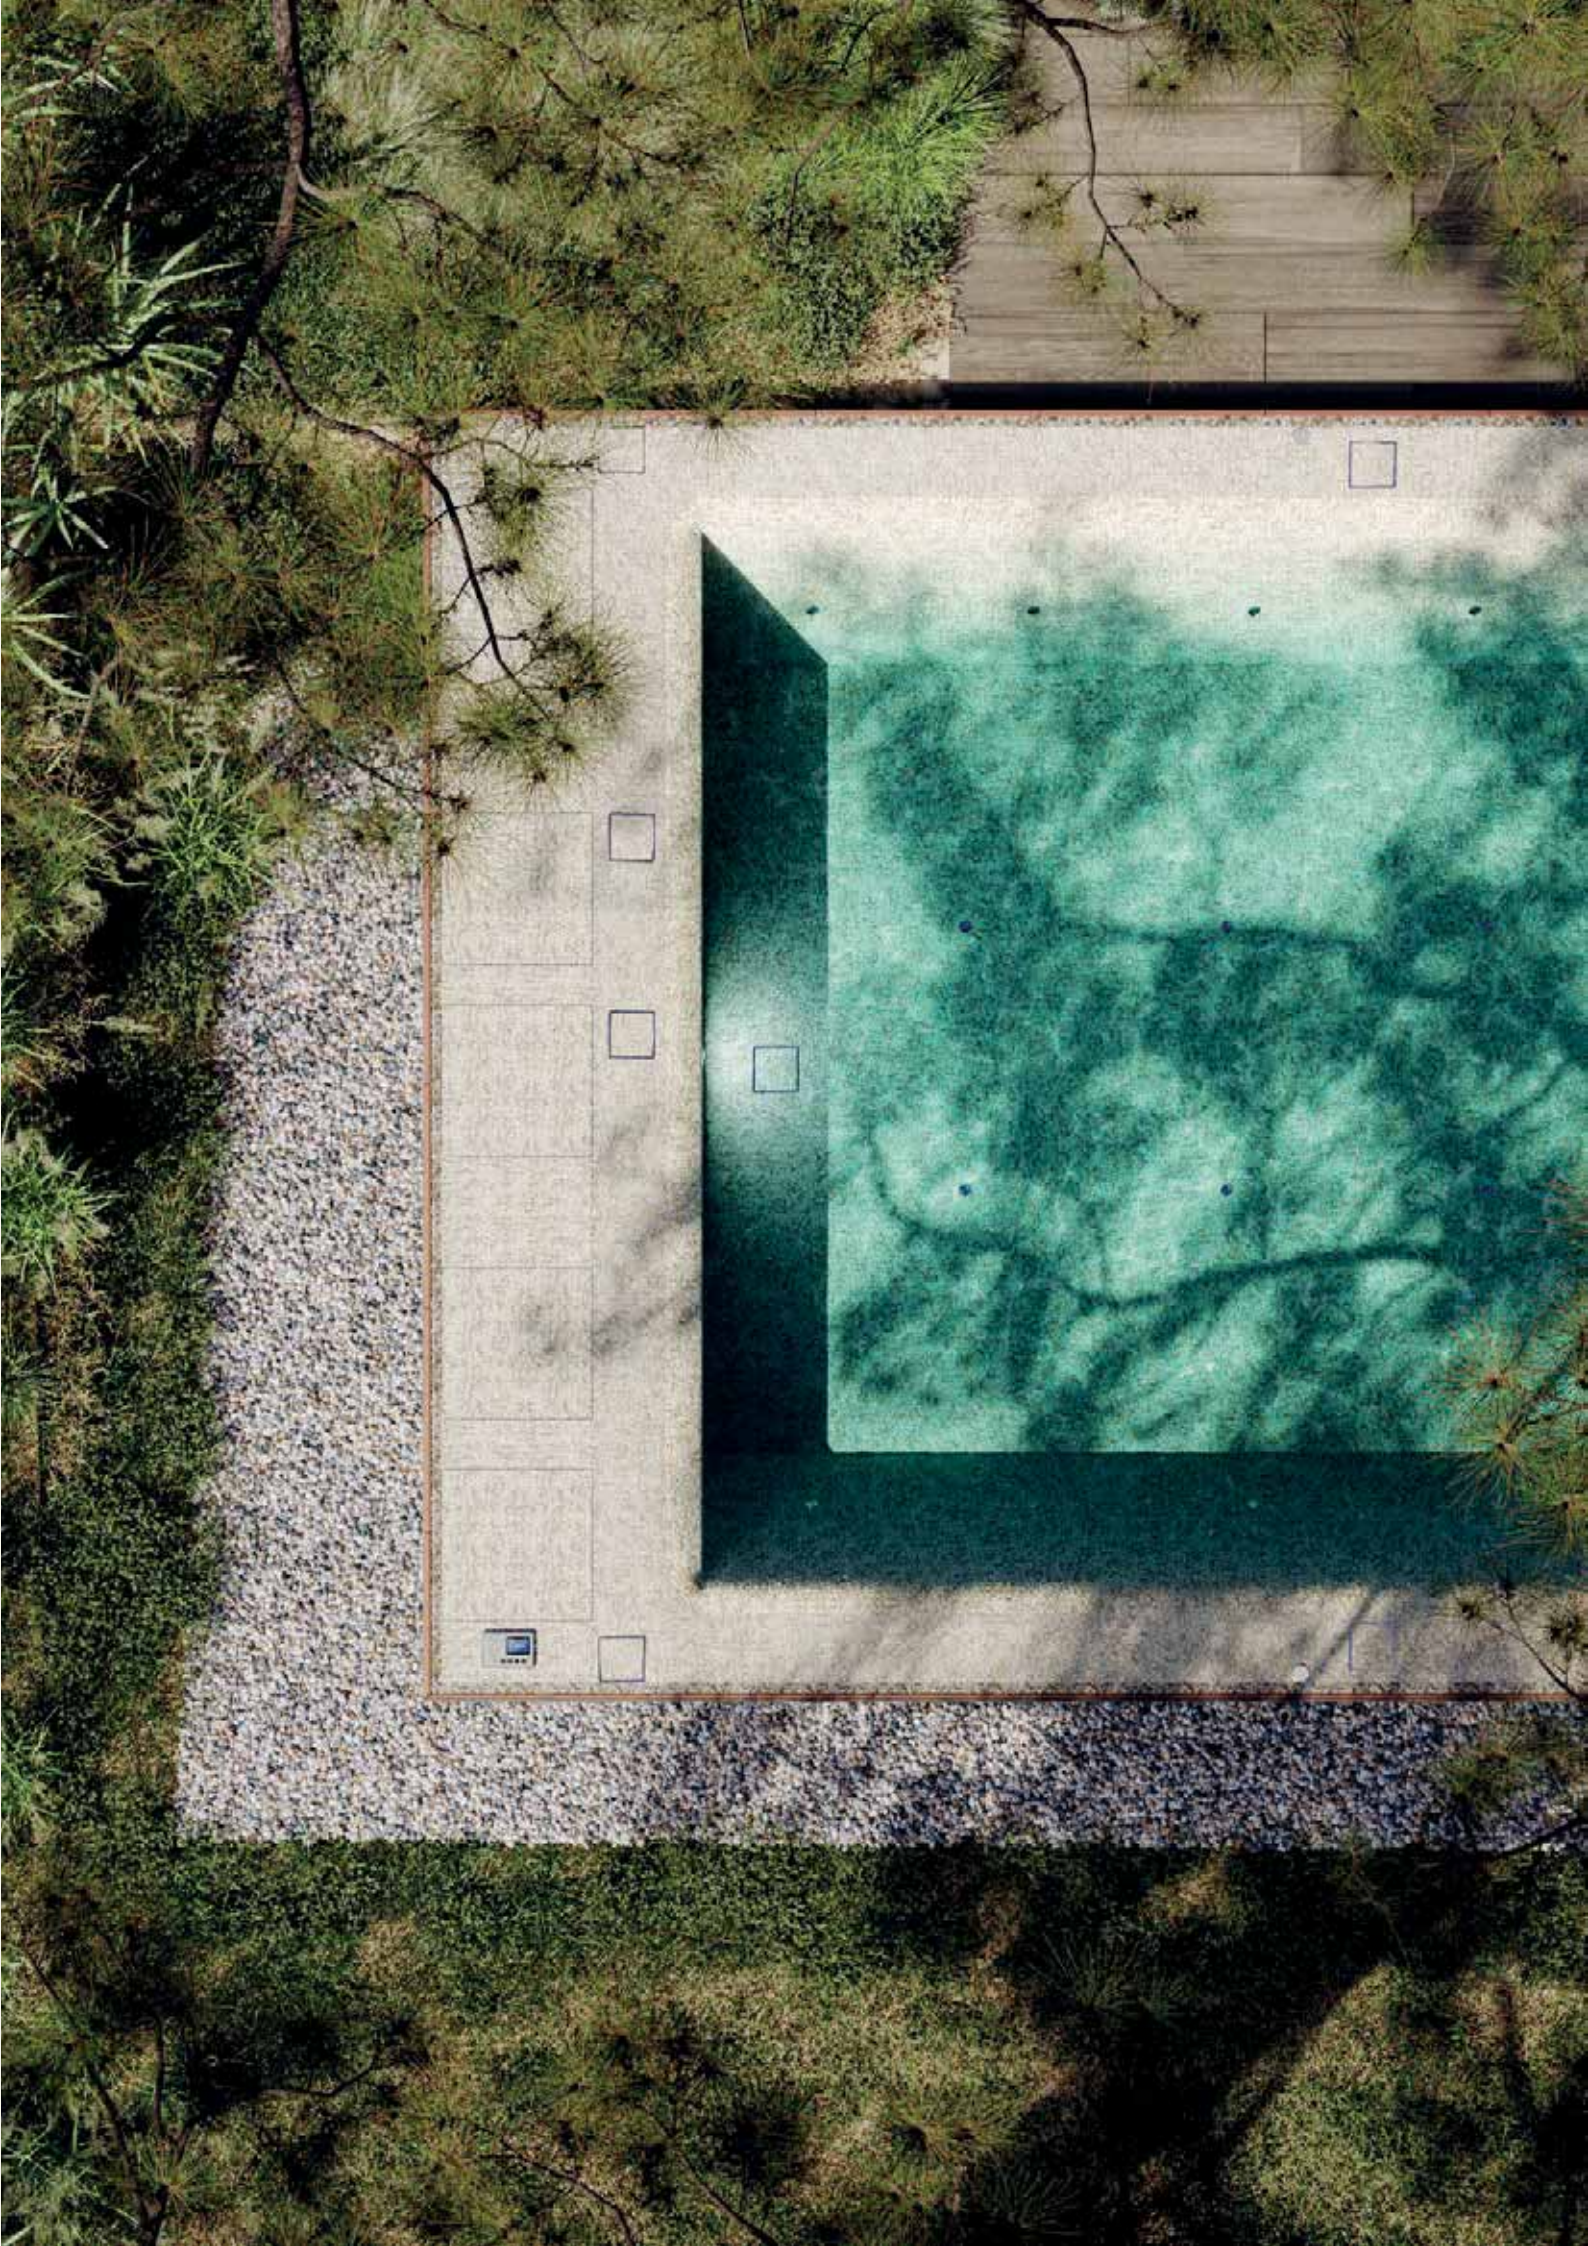

LIVE ICONIA

FREEDOM OF CONFIGURATION

ICONIA, the mini-pool where nature and design come together in harmony. Organic coating and modularity of forms offer you the freedom to shape a fluid space. ICONIA

is a continuous process of evolution, changing materials: reflections, light and harmony of each stone grain. Listen to the sound of relaxation, experience ICONIA.

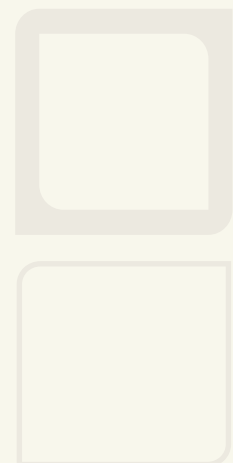

A REFUGE FOR THE SENSES

EXPRESS YOUR PERSONALITY

ICONIA is the place where everything slows down, where water caresses your thoughts and transforms them into stillness. Every reflection, every movement of the water tells a story of har-

mony, inviting you to let go, to breathe deeply, to find yourself. ICONIA is more than an object: it is an expression of who you are and what you love.

With the ICONIA mini-pool, you have the power to express your uniqueness. Configure every detail, from natural coatings to modular dimensions, and create a space that speaks about you. Make ICONIA an

expression of your style, the sound of your relaxation. A design philosophy that ensures the pre-eminence of functionality, re-establishing a sense of human connection, shaping a timeless object.

SHAPE IT

The ICONIA solution is based on a flexible modular system, with a first 48cm module and subsequent 65cm modules, 63cm high. Made of corten-coloured galvanised steel and L-shaped, they offer elegance and versatility. This modularity allows for customisable configuration and ensures aesthetic and visual purity, bringing harmony to any space.

A close-up, artistic photograph of a hand holding a fountain pen. The pen is dark with a silver-colored clip and nib. The hand is positioned in the upper left, with the pen pointing towards the center. The background is a blurred desk with a lamp and some papers, creating a sense of depth and focus on the pen and hand.

BENEATH THE SURFACE

Beneath the surface of ICONIA there is a silent world, where water creeps between the quartz grains, gently caressing each crevice. It is a slow, almost poetic journey in which matter and water interact, filter, breathe together. Here, beneath the visible, nature intertwines, creating a hidden harmony that tells stories of timeless balance.

COATINGS ICONIA

A material journey through quartz, stone and resin purifies spaces and transforms water into the most elegant of dances.

A continuous process of evolution, changing materials: reflections, light and harmony of each grain of stone.

ARKAIA

TICINO PEBBLE

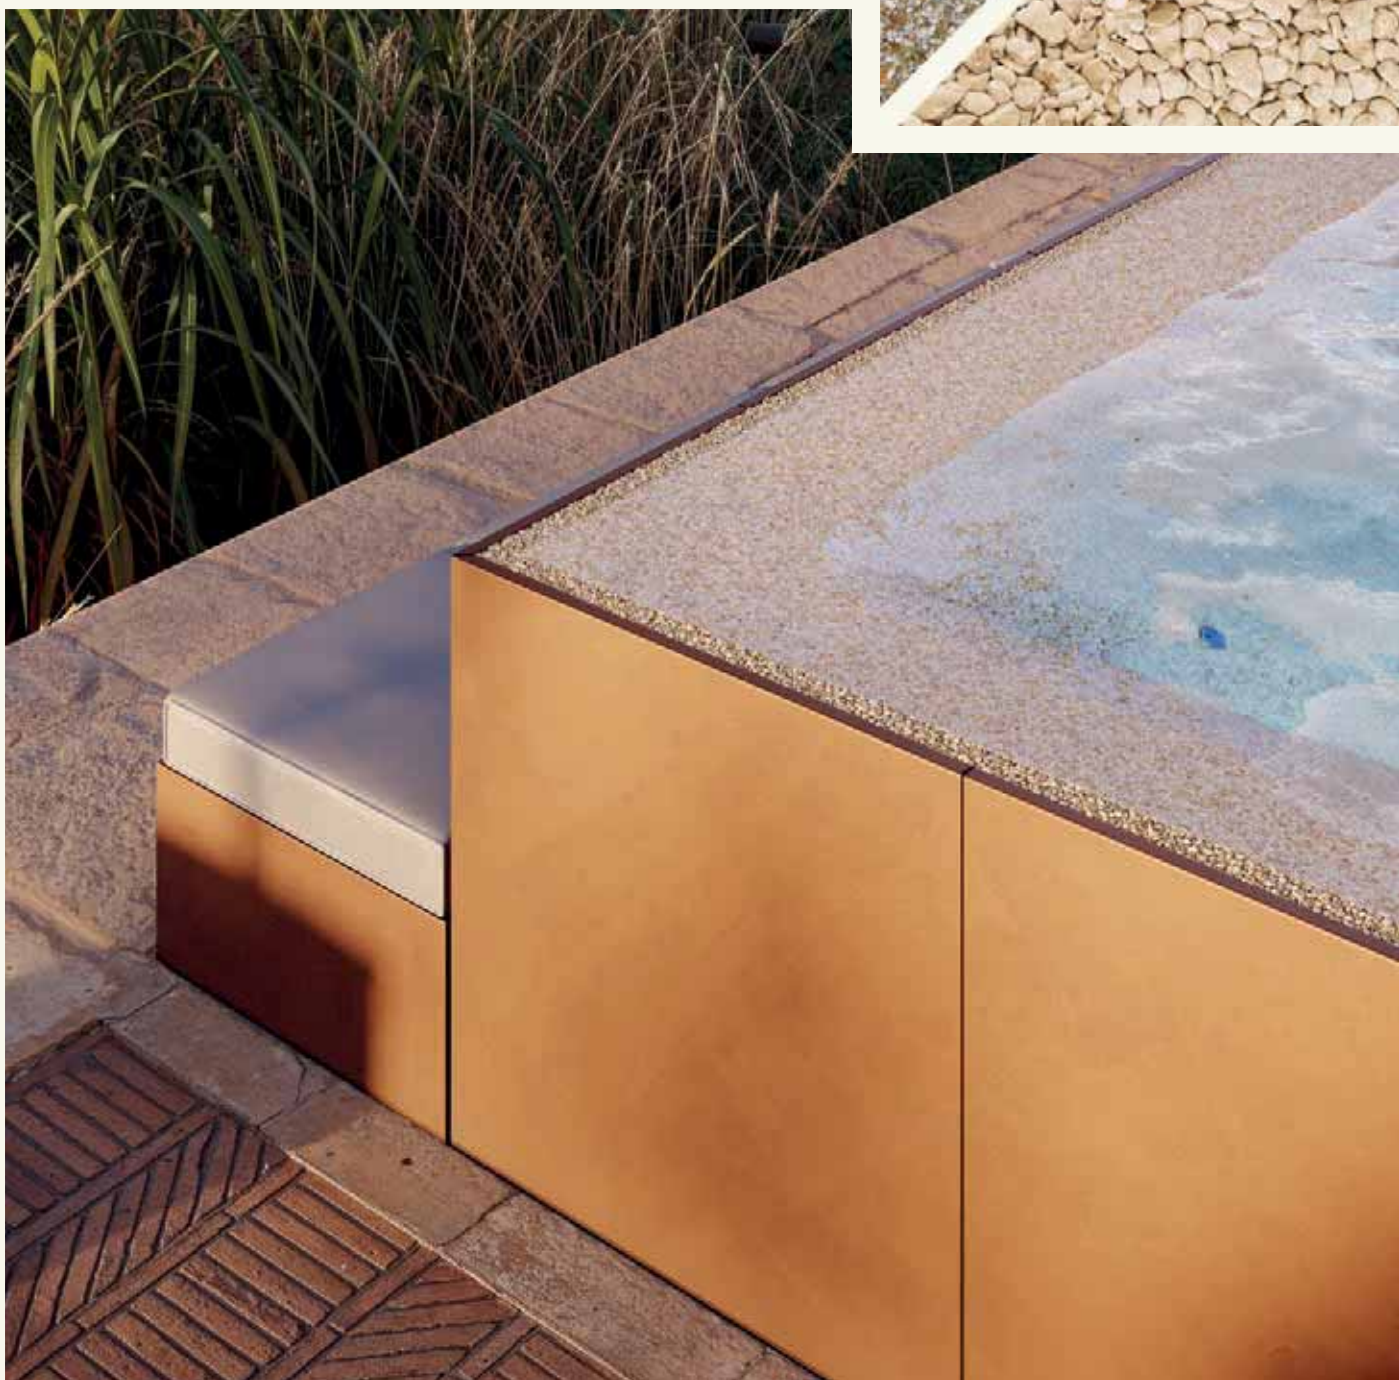

A blend of natural quartz and sands from the banks of the Ticino River to recreate the reflections of turquoise waters. Ticino pebble perimeter inserts in earthy colours.

LUXIA

BOTTICINO PEBBLE

A blend of natural quartz and yellow spherical quartz, quarried from the French Alps. A straw-yellow colour that recreates the chromatic reflections of exotic seas. Small gems of dolomitic Botticino marble embellish the perimeter inserts.

KALOS

DUNA PEBBLE

A mix of quartz and sand that echoes the grain size of the Arkala coating, gifting the beauty of crystalline reflections. A fusion of pebbles extracted from the Rhine and Ticino rivers makes for an explosion of colours, embellishing the perimeter inserts.

ACCESSORIES ICONIA

Explore the collection of premium accessories for ICONIA and transform your experience. From the NYX cover, which can be walked on and protects, to the KOS perimeter seating, which enriches the space, to the HERMES cushions, which mask the shafts of the technical room, making them functional.

The LITHOS panels covering the outer walls and the KIMERA corner element, which is available in various options, complete ICONIA. Each element is designed to combine design with versatility of use.

LITHOS

EXTERNAL PANNELLING

LITHOS embodies the changing soul of the ICONIA materials. TITAN, a slate coating, offers a robust and material presence, while HECATE, with its texture reminiscent of lunar soil, adds an abstract and welcoming dimension. Exclusive materials fashion the outside space with a fusion of textures, colours and shades, reshaping the outdoor design experience with a touch of contemporary aesthetics.

MATERIALS, REFLECTIONS, VEINING...

LITHOS

KOS

PERIMETER SEATING

Picture a journey to a Mediterranean destination - an Apulian farmhouse or a typical Greek cottage - where every detail speaks of relaxation and well-being: this is the essence of ICONIA's KOS perimeter seating. This is not just an accessory, but an invitation to live the dream of a getaway, where the beauty of design merges with absolute comfort. KOS seats transform every moment spent near the water into a sensory experience, amplified by the sound of gurgling. A design inspired by human needs, exquisite aesthetics combined with functionality.

A SUMMER DREAM,
TO REDISCOVER
WELL-BEING

HERMES

COVER CUSHIONS

HERMES is the symphony of poolside comfort. Designed to conceal the technical room, HERMES cushions restore aesthetic purity and material continuity. These small pieces of seating combine style and utility. A utility that becomes versatile, going to form the premium NYX cover.

KIMERA

CORNER ELEMENT

KIMERA is an element, a corner, a way of redefining ICONIA with its multifaceted nature. Coated with LITHOS panels and made of EPS, this corner element changes, transforming itself into a side table or planter. An enriched space, declined to your liking.

KIMERA

NYX

MODULAR COVER

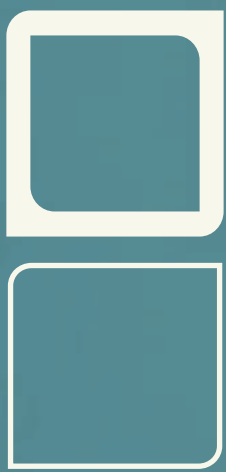

HERMES cushions come together to protect the warm essence of ICONIA, floating on its waters. A cover that, once composed, becomes a walkable, waterproof surface to lie on and sunbathe. NYX lets you relax, lulled by the movement of the water. Maintaining the warmth of the water, safeguarding the environment and preserving your wellness experience: this is the NYX cover.

A FUSION OF PRACTICALITY BETWEEN THE ELEMENTS

NYX

ICONIA TECHNOLOGY

ICONIA was developed from the tradition of craftsmanship. A patent that lies beneath the surface, each ICONIA is a unique piece, where Italian savoir-faire meets customised design.

ICONIA is equipped with LED lights to create the perfect atmosphere, water heating with heat pump and temperature control for maximum comfort. The aerotherapy nozzles distribute air directly from the permeable coating for a gentle and relaxing massage.

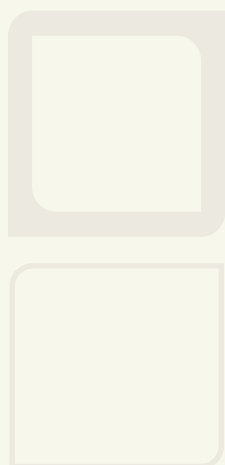

PATENTED TECHNOLOGY

ICONIA is not just a mini pool: it is a place of tranquillity where nature and technology meet to give you a break from the world. Every grain of quartz, every drop of water, is part of a larger symphony that invites one to reconnect with the natural rhythm of life.

The water comes alive with gentle aerotherapy bubbles, while the

lights, adjustable in colour, create an atmosphere that evolves as the sun goes down. The temperature adapts to your preferences, turning every dive into a moment of pure well-being.

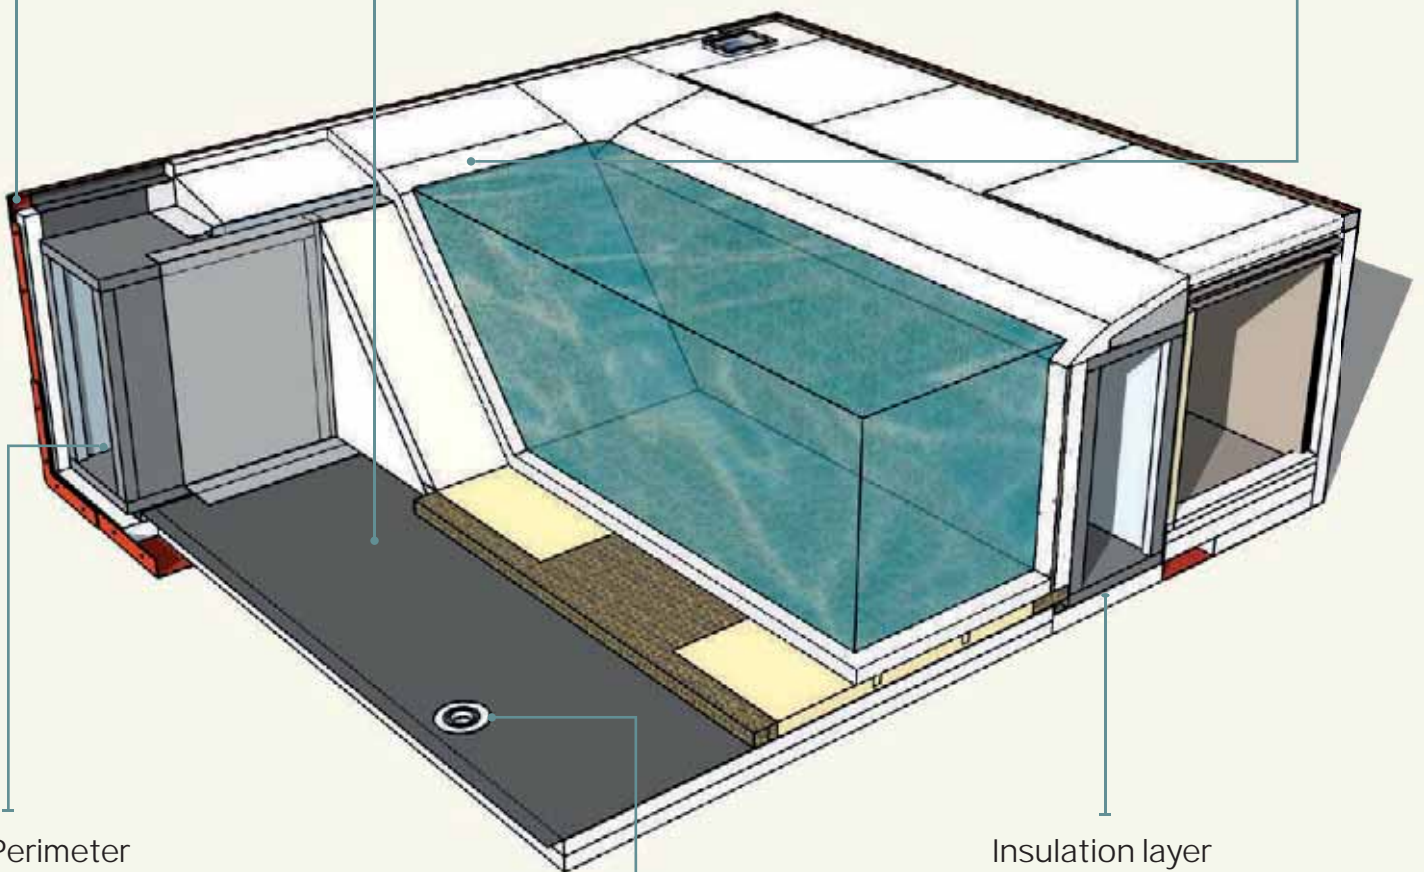

Through the natural coating, composed of quartz grains, water finds its way, permeating through ICONIA's invisible skimmer.

SAFETY

ANTIBACTERIAL FLOORING

Every single grain is treated with a special antibacterial technology developed with Microban®. A technological process that integrates perfectly with filtration, guaranteeing clean, crystal-clear

water. ICONIA coating is enriched with Microban® SilverShield® antibacterial technology; a valuable and efficient tool in the fight against bacterial proliferation.
